

CONFIDENTIAL DRAFT STATEMENT

(Because this is brief, I propose that I'd use this as a "script" in conversation rather than sending a written statement.)

Dr. Caryn Dutton, assistant professor of obstetrics and gynecology at UW-Madison, has accepted a faculty position at Harvard Medical School and Brigham and Women's Hospital in Boston. She will leave UW (date). Dr. Dutton served UW Health as an obstetrician and gynecologist for several years. We are grateful for her service and wish her the best in her new role at Harvard.

- Q. Dr. Dutton performed abortions at PPWI and was expected to offer second-trimester procedures at MSC. What happens to those plans?

Our plans continue. While we have other providers available and willing to provide procedures, in the interest of their safety and security and that of our patients we will not provide specifics.

- Q. What will happen to abortion procedures at PPWI?
(to be determined after I talk to PPWI)
