Subject: RE: Statement to Media

The whole topic of second trimester abortions has been a UW Health issue -- and unfortunately the media has tied the whole issue to UW Hospital. Even though the focus of the media this time was on MSC, the larger question was what is UW Health doing? The stories were very negative to us in the press and it would have been a mistake to not have a response.

Why do we need to say anything about this? Isn't it an MSC issue now?

Ron

Subject: Statement to Media

Attached is a media statement we have sent in response to the media coverage today about MSC. I worked with Pete Christman and Jeff Grossman in getting this together and approved. Tonight we will also send a similar statement to employees and clinical faculty so that they are hearing the message directly from us. << File: MSCStatementtoMedia.doc >>
