

# Stop Planned Parenthood's birth control agenda!

*Let's tell the Wisconsin Congressional Delegation to...*

*"Oppose the Prevention First Act (**PFA**)!"*

We, the undersigned, call upon Senators Kohl, Feingold, and all members of the Wisconsin Congressional Delegation to oppose the **Prevention First Act (PFA)**. The PFA is federal legislation that would provide millions in taxpayer dollars for Planned Parenthood and implement much of their coercive family planning/birth control agenda. It would make Title X (family planning) a permanent program and fund it at \$700 million or more, it would force all health insurance plans that cover prescription drugs to also cover abortifacient contraceptives, and it would take away federal money from *any* hospital that refuses to provide abortifacient "emergency contraception" to rape victims upon their request. Government-funded/forced birth control encourages sexual promiscuity and with it a host of social pathologies including underage pregnancies, chemical and surgical abortions, and sexually transmitted diseases. Please stop the PFA!

## **What is the Prevention First Act?**

The PFA is federal legislation that would provide millions in taxpayer dollars for Planned Parenthood and implement much of their deadly family planning/birth control agenda.

The PFA would:

- make Title X (family planning) a permanent program and fund it at \$700 million or more;
- mandate that all health insurance programs that cover prescription drugs also cover abortifacient
- contraceptives;
- create a government program to promote/push abortifacient “emergency contraception;”
- take away federal money from *any* hospital that refuses to provide abortifacient “emergency contraception” to rape victims;
- appropriate massive funding for Planned Parenthood style sex education programs (abstinence-only programs are specifically excluded from funding); and
- permanently include family planning services as part of the Medicaid program.
